QUARTERLY HIGHLIGHTS

Cutting-edge Features To Enhance Your Business Operations

Streamlining Processes:

ADAMS Enhances Accounting Integration

Our continuous pursuit of excellence in accounting solutions reaches a new milestone with the integration of AutoCount v2.0.

Expanding on our existing support for SAP HANA, Xero, Oracle ERP, and Microsoft Dynamics, this integration is designed to enhance efficiency and accuracy for businesses. By eliminating double entries and automating data population into key document types such as Purchase Orders and Invoices, ADAMS ensures a streamlined process. This significant advancement results in a considerable reduction in the workload for finance teams handling high volumes of sales transactions, guaranteeing quicker generation of Balance Sheets and Profit & Loss statements.

Trade Promotion Scheme For Increased Flexibility And Customisation

Our user-friendly ADAMS system efficiently manages promotions, offering percentage or amount-based discounts with specified start and end dates. In addition, ADAMS now also allows promotions to target specific customer groups or individuals, and offers innovative combinations like "Buy 10 SKU, Get 1 SKU Free," "Buy SKU A, Get SKU B Free," or even "Buy SKU A and Receive a Discount on SKU B."

ADAMS's versatile, intricate, and customisable features, set it apart from other applications. Experience an efficient, error-free, and dynamically controlled promotion process.

A State-of-the-art Geofencing Feature To Enhance Customer Interactions

Crucial for effective communication between sales teams and customers, it ensures successful sales and recurring orders. This technology mandates that your sales personnel are physically present at the outlet before initiating order-taking activities, guaranteeing they meet specific criteria for retail tasks like stock checks and surveys. This not only prevents off-site order taking but also ensures services are delivered directly to the customer, enhancing overall customer satisfaction.

ADAMS AI, APAC's leader in supply chain management & data science, integrated with B2B2C fintech, HR tech and workforce management.

- Trusted by leading companies all over SEA
- Sales, warehouse, inventory & operations planning, logistics, retail (B2B2C)
- Business intelligence & predictive analytics
