Mastering Inventory Management

5 Unique Warehouse App Features

ADAMS takes inventory management to new heights. It includes 5 unique features designed to monitor and track warehouse inventory, optimise efficiency, and control stock flows.

Warehouse, Bin & Location Management

Create warehouses and define bins and locations, optimising stock placement for quick and efficient retrieval.

Goods Receiving from Supplier

Simplify receiving processes and reduce human errors with barcode scanning and digitizing data entry.

Stock Issue Notes

Easily generate issue notes for third-party logistics, ensuring accurate loading of goods to their transport, minimising conflicts like missing stock or incorrect deliveries.

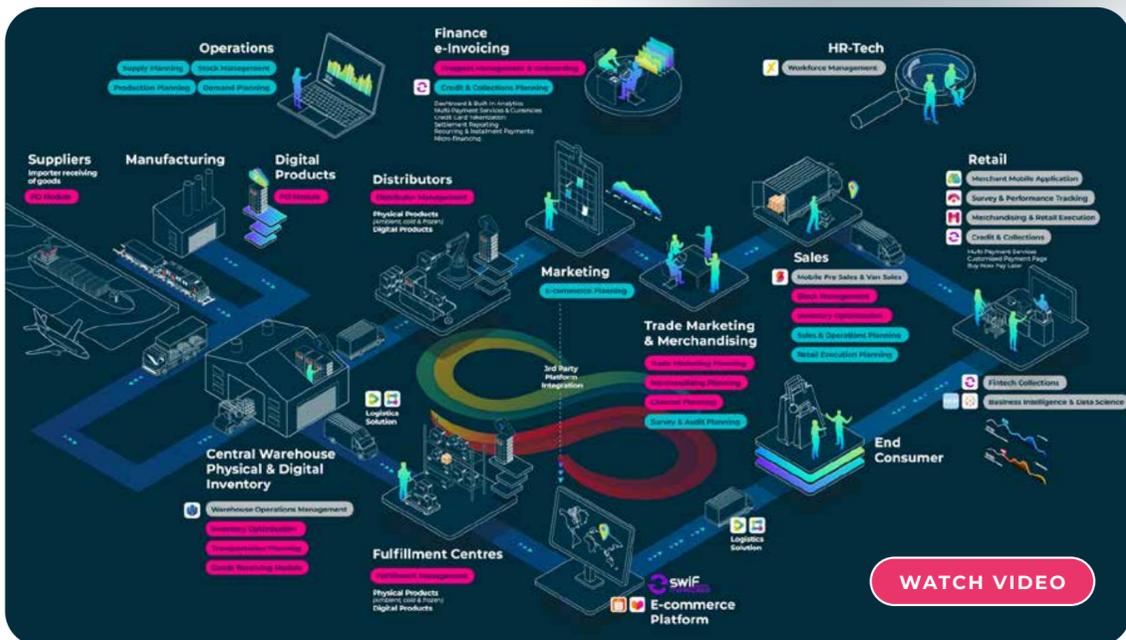

Pick List

Generate pick lists based on destination and goods type, using features like FIFO or LIFO to prioritise older stock for delivery.

Generate DO & Invoice

Auto-generate delivery orders and invoices upon completion of pick lists, streamlining the order fulfillment process.

With ADAMS, businesses can enhance inventory management and streamline operations effectively.

Explore further in this video to gain a comprehensive understanding of how ADAMS enhances your operations throughout every stage of the supply chain. [> Watch video](#)

PRODUCT INNOVATION

SHELFMON Empowering Retail with AI Merchandising Insights

Introducing **ShelfMon**, ADAMS' cutting-edge AI Merchandiser app revolutionising the retail landscape. With seamless image upload to our ADAMS Server, our AI engine swiftly analyses SKUs for Share-of-shelf, POSM Compliance, On Shelf Availability, and Planogramme Compliance, while identifying Out-of-Stock items. This enables rapid marketing actions, optimising visibility and availability for increased sales opportunities. ShelfMon delivers real-time insights, saving valuable time from promoter to HQ. [> Learn more](#)

SwiF Payment Gateway Integration with Adobe eCommerce

Formerly known as Magento eCommerce, Adobe eCommerce now seamlessly integrates with our SwiF Payment Gateway plug-in. This integration empowers customers with a wide range of payment methods including Touch 'n Go, Boost, Credit Card, and more at checkout, ensuring a seamless payment experience, enhanced flexibility and convenience for your customers. Streamline Your Sales Operations Introducing BUDGET & CLAIMS

ADAMS dashboard provides a single point of contact for raising budget requests, real-time expense monitoring, and efficient budget allocation. Empower your sales team with ADAMS's latest features:

- Raise budget requests and seek approvals
- Identify and detail participating outlets, SKUs, and add-ons such as listings, banners, and premium gifts
- Capture and share campaign evidence for seamless claim submission
- Monitor expenses effortlessly and facilitate prompt reimbursement to your distributors [> Learn more](#)

Be e-Invoice Compliant Ready

e-Invoice Roll-out

Starting August 1, 2024, businesses with a turnover above RM100 million will be required to comply. Subsequent phases include businesses with turnover between RM25 million and RM100 million by January 1, 2025, and all other taxpayers by July 1, 2025, ensuring a smooth transition.

Benefits of e-Invoicing

e-Invoicing streamlines tax processes, enhances business efficiency and compliance. It simplifies invoicing, automates data entry, and integrates seamlessly for tax filing. This saves time and costs, benefiting businesses greatly.

Transaction & Document Types

e-Invoice implementation covers B2B, B2C, B2G, ecommerce, and select inward transactions. It enables near-real-time validation and storage of transactions. e-invoices include Invoices, Debit, Credit, as well as Refund Notes.

e-Invoice Process Flow

Generate e-invoice

Generate your Invoices, Debit, Credit and Refund Notes embedded with SwiF payment link directly in ADAMS.

Real-time integration

ADAMS seamlessly uploads your documents to the LHDN system for validation and automatically prints the Unique Identification Number on the invoice along with the QR code as proof of validation.

Share with your customers

The validated e-invoices embedded with SwiF payment link allows your customers to make direct payment through our payment gateway by selecting their preferred payment method.

Whether you already have an accounting system in place or not, ADAMS is integrated via API programming and enables direct data transmission between taxpayers' system and MyInvois system, thanks to its SWiF Payment Gateway & e-Invoice Plug-in.

Your Voice Matters

We value your feedback and strive to continually improve our services. Thank you for being part of the ADAMS AI family. > [Contact Us](#)
